Papish is a Latin Pop band based in Montreal. Their sound is a unique fusion of dance, cumbia, bachata & pop. Their use of native South American instruments alongside modern technology is a unique expression of their innovative spirit.

Papish's debut **'Alzar La Voz Sin Reclamar' (2021)** was met with critical acclaim, garnering attention in the Quebec mainstream press for fusing dynamic sounds with multilingual lyrics advocating for freedom of expression and equality. The band was further recognized with an invitation to participate in the coveted 'Sily d'Or contest' in 2022 and won 2nd place during the 'Festival International Nuits d'Afrique' in 2022.

The group is made up of **founder/singer/composer Osvaldo Aguirre, bassist/music producer Cesar Blazquez, and drummer/artistic director Gervasio Canda.** Their creative identity is expressed through the band's visual components. All three members are accomplished filmmakers and integrate these talents into their live performances.

Fantasy comes to life on stage, with visuals exploding through giant screens, culminating into a beautiful mix where film and music are combined to achieve an out of this world audiovisual experience. This immersive audiovisual experience not only lives on stage but in album art and social media content too.

Papish push for progressive content, exploring sexuality, diversity and the multiculturalism that is making Canada a modern country. The band works with film studios to develop scenography and 2D animation for the stage. These elements coalesce beautifully, creating a musical experience where art and music come together in magical ways. Continuous touring is the cornerstone of the band's ethos and it has helped Papish build a loyal fanbase in key markets of Quebec & Canada. 2024 will bring more touring as the band is already booking dates in the USA and South America.
